

**UNDERGROUNDING OF UTILITIES PROJECT
PHASE 1 SOUTH**

**UNDERGROUNDING
TODAY**
For A Better Tomorrow!

**NOTICE OF CONSTRUCTION
TO RESIDENTS & BUSINESS OWNERS**

Date: May 15, 2019

Reference: Town-Wide Undergrounding Phase 1 South Construction Project.

**Type of Work: Condominium Electrical Conversions from Overhead to New
Underground Service.**

Location: South Ocean Blvd. From Address 3170 to 3475 (South Town Limit)

Dear Residents /Businesses

Starting in May we have received orders from FPL for their process of switching the individual properties from overhead to underground services. Currently, we only have the properties from 3170 S. Ocean Blvd. to 3475 S. Ocean Blvd. We are in the process of meeting with each property, reviewing their FPL Vault Room and discussing the best day to make the conversion. This is how the process will work. (1) FPL will provide us with switching orders, which will give us specific address locations and their sequencing for the conversion. (2) We will contact each property prior to the conversion to schedule the work. We will have some flexibility to work with each property owner as to when the electrical power is shutdown. This is to minimize the disruption to any of your events or critical activities at your property. (3) After scheduling the conversion of your property, at the time of conversion, the power will be turned off. The power will be off from 2 to 6 hours for the conversion. Each property is different, so the actual duration of the power shutdown will vary. Some properties will NOT require an electrical shut down. All this will be discussed at the meeting. (4) After the conversion you will be notified when the power is restored. Thank You in advance for your cooperation.

For further information you may contact either of the individuals listed below.
